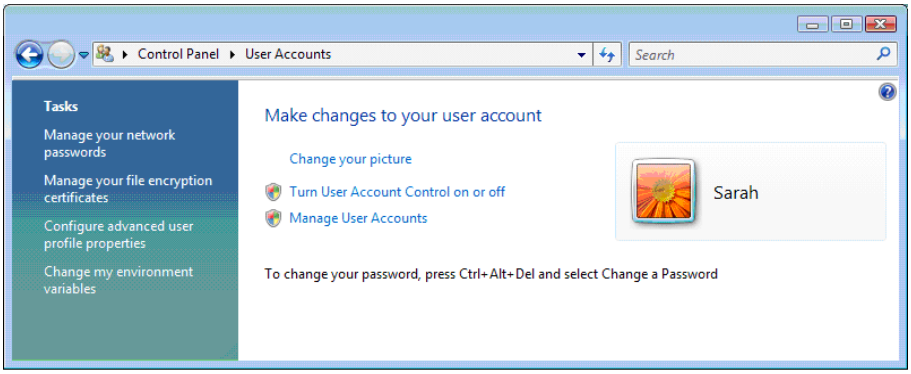
CropBench – Vista User Guide

CropBench users with Windows Vista will need to switch off '**User Account Control ' (UAC)** to allow CropBench to be installed/ update. After installation/ update, UAC can be switched back on.

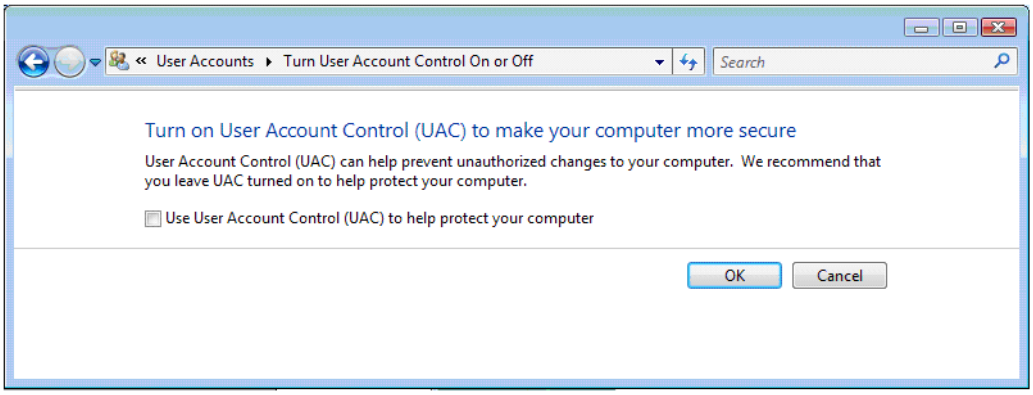
Use the following instructions to turn UAC off and the on again after installation of CropBench.

1. Firstly open the **'Control Panel'** and then select **'User Accounts'**



Control Panel ▸ User Accounts
Search
Tasks
Manage your network passwords
Manage your file encryption certificates
Configure advanced user profile properties
Change my environment variables
Make changes to your user account
Change your picture
Turn User Account Control on or off
Manage User Accounts
Sarah
To change your password, press Ctrl+Alt+Del and select Change a Password

2. Then select the option **'Turn User Account Control On or Off'**



« User Accounts ▸ Turn User Account Control On or Off
Search
Turn on User Account Control (UAC) to make your computer more secure
User Account Control (UAC) can help prevent unauthorized changes to your computer. We recommend that you leave UAC turned on to help protect your computer.
Use User Account Control (UAC) to help protect your computer
OK
Cancel

3. In the dialogue box that appears there is the option to turn on (ticked box) or turn-off (un-ticked box) the User Account Control
    a. **If the box is ticked, then click to un-tick**
    b. Then Click OK to save
4. You will then be asked to restart your computer (now or at a later time) for the changes to be saved.
5. Once the computer has been restarted and the changes have been saved the CropBench software should then install and update correctly.
6. Once the CropBench software is installed and updated the UAC can then be turned back on again (if the user so wishes) by repeating the above instructions and then ticking the box to turn on 'User Access Control'
